

RYZON
BAKING POWDER

Not merely baking powder but increased leavening power. The special process of manufacture is the reason.

RYZON is an improvement over old-fashioned powders. It has more raising power, is a slow, steady raiser. It retains its full strength to the last spoonful.

Order a can today. Have rich, brown, fragrant RYZON biscuits for every meal.

Today's Events

Fortieth anniversary of the organization of the Knights of Columbus. One hundred and fiftieth anniversary of the death of Emanuel Swedenborg, founder of the Church of the New Jerusalem.

The twelfth annual convention of the National Council of the Boy Scouts meets in Chicago today for a two-day session.

San Antonio is to be the meeting place today of the annual convention of the Women's Missionary Council of the Southern Methodist Church.

Memorial exercises are to be held today for John Burroughs the eminent American naturalist, on the first anniversary of his death.

In The Day's News.

Ellis Thompson, who today enters upon his 70th year, ranks among the foremost of the world's electricians and inventors. His genius and achievements have been recognized by numerous awards and decorations, the honors bestowed upon him including the first Edison medal, the Rumford medal, the John Fritz medal, and a medal from the Royal Society of London. Professor Thompson is a native of Manchester, England, who coming to America early in his career, was educated in the Philadelphia public schools, and after his graduation started his career as a teacher of chemistry and mechanics. While thus engaged, he was constantly experimenting, producing new devices, and attracting attention by his writing on electricity. In 1880 he ceased to be a pedagogue and became a producing and vending electrician, engaging in the manufacture and distribution of hundreds of his own patented devices. Today he is the consulting expert, as well as part owner, of the largest corporation in the world in the manufacture of electrical machinery.

Today's Anniversaries.

1802—Samuel Digger, seventh State governor of Indiana, born in Warren county, Ohio. Died at Ft. Wayne, Ind., Sept. 9, 1846.

1840—George, known as "Beau" Brummel, the celebrated English man of fashion, died in poverty at Caen, France. Born in London in 1778.

1847—Vera Cruz surrendered to the Americans after a bombardment of nine days.

1848—John Jacob Astor, the son of a lowly German butcher who became the wealthiest American of his time, died in New York. Born at Waldorf, Germany in 1763.

1867—British Parliament passed the British North America Act, providing for a union of the Canadian provinces.

1872—Agricultural laborers in England formed a union.

1876—Ex-President Grant was given a public reception in Cincinnati.

1880—A decree was issued dissolving the Jesuits and other orders in France.

Today's Birthdays.

Theodore Hrentano, the new U. S. Minister to Hungary, born at Kalamazoo, Mich., 65 years ago today.

Sir Edwin L. Lutyens, celebrated English architect, born in London, 53 years ago today.

Dr. Murray Bartlett, president of Hobart College, born at Poughkeepsie, N. Y., 51 years ago today.

Ellis Thompson, noted American electrical engineer and inventor, born in England, 69 years ago today.

Dent T. (Cy) Young, one of the greatest baseball pitchers of his time, born at Gilmore, O., 55 years ago today.

COUNTRY BEST FOR CHILDREN, SAYS BURBANK

Plant Wizard Declares Children in Rural Sections Should Not Attend School Until Ten Years Old

Santa Rosa, Cal., March 28.—Boys and girls of small towns should not be allowed to see the inside of school houses until they are ten years old. Luther Burbank, noted plant wizard, declared in a message responding to greetings from neighbors on his seventy-third birthday here recently.

"I speak of the boy or girl who has the privilege of being reared in the only place that is truly fit to bring up a boy or plant—the country or the small town—the nearer to nature the better," he said. "In the case of children compelled to live in the city, the temptations are so great, the life so artificial, the atmosphere so like that of a hothouse, that such a child should be placed in school earlier as a matter of safeguard."

Mr. Burbank said his life work with plants has convinced him that the same treatment and care necessary to the highest development of plant life is essential to the highest development of human life.

"All animal life is sensitive to environment, but of all living things the child is the most sensitive," he declared. "Surroundings act upon us as the outside world act upon the plate of the camera. Every possible influence will leave its impression upon the child, in many cases even overcoming heredity. A child literally absorbs environment. The proper influence applied during the impressionable period will cause an effect that will be pronounced, immediate and permanent."

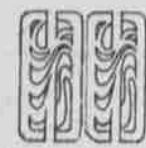

"Pick out any trait which you may desire in a normal child, honesty, fairness, purity, loveliness, industry, thrift. What not, by surrounding a child with sunshine from your heart and the open sky giving it free communion with nature, well-balanced and nutritious food, and you may fully attain the desired object."
